SportCruiser

by Czech Aircraft Works rso.

the airplane | style

The sportive lines of the new SportCruiser immediately shows the character of this stylish sports aircraft. It's design is eminently flyable, enjoyable and still affordable. A 'deluxe' leather upholstery accentuate the chique appearance.

Sporting fantastic visibility, this all-metal, low wing, is the No.1 selling light aircraft for 2007.

the pilot | space

With a shoulder width of 121cm the SportCruiser is far out the most spacious two-seater with in the GA-market.

Pilots up to 1m98 have a comfortable seat, pedals are adjustable with-in a wide range.

There is room for full-size suitcases. Additional baggage room is available in the wing-lockers.

the thrill | speed

The modern low-drag wing profile is optimized for high speed. The large fowler flaps drops the stall speed to 27 knots. The liquid cooled 100Hp Rotax engine boosts the SportCruiser to a economical cruise speed of 110 Knots and more.

the costs | technology

The engine runs on Automotive fuel or Avgas, fuel consumption can be as low as 12L/h.

The airframe and power plant are of modern low maintenance design.

The high-tech Instrument panel can be equipped with a dual screen dynon glass cock-pit with back-up analogue flight instruments.
